SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures & Algorithms (200+ problems solved on LeetCode) and hands-on experience in frontend development (React.js, JavaScript), with a growing foundation in backend concepts (Node.js, Express.js). Built multiple full-stack web projects, including a news credibility checker with a custom REST API. Seeking a Software Engineering internship to apply strong problem-solving and full-stack skills.

WORK EXPERIENCE

C++ Developer Intern | Dec 2025 – Jan 2026

InternPe

- Built interactive console-based games in C++, applying core programming concepts including loops, functions, and conditionals.
- Designed game logic covering user input handling, scoring systems, and basic algorithmic decision-making.
- Strengthened debugging and problem-solving skills through iterative testing of game mechanics.

PROJECTS

AI Fake News Detector

Tech Stack: React, Vite, Node.js, Express, Framer Motion, i18next

- Built a full-stack news credibility checker with a React/Vite frontend and an Express/Node.js backend, communicating via a custom REST API.
- Designed a rule-based heuristic engine to flag fake-news indicators (clickbait phrasing, excessive capitalization, sensational language) versus credibility indicators (cited sources, statistics), returning a verdict with a confidence score.
- Added multi-language support (English/Hindi) with i18next and an analytics Stats Panel to track evaluated inputs, using Framer Motion for interactive UI transitions.

Travel Agency Website

Tech Stack: JavaScript, HTML, CSS

- Designed and built a 6-page travel booking platform from scratch, including a destinations catalog (9+ listings), booking form, and login/sign-up/forgot-password pages.
- Implemented client-side form validation using JavaScript (e.g., required-field checks on login and booking forms) with user feedback via alerts and conditional page redirects.
- Built reusable, consistent UI components (navigation, cards, forms) across multiple pages using vanilla JavaScript and CSS, without a frontend framework.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Expected : May 2029

KIET Deemed-to-be University

- CGPA : 8.64

SKILLS

- Languages: C++, C, Python, JavaScript
- Frontend: HTML, CSS, React.js, Tailwind CSS
- Backend (learning): Node.js, Express.js
- Database: MySQL
- Tools: Git, GitHub, VS Code

ACHIEVEMENTS

Solved 200+ DSA problems on LeetCode, covering arrays, strings, trees, binary search, stack, queue
